69. Grumpy co-worker?
70. Barq's rival
71. Insertion of words between parts of a compound, as in "un-freaking-believable"

## DOWN

1. Heels
2. With 27-Down, Indian spinach and potato dish
3. Driving hazards?
4. Dew Drop \_\_\_\_\_ (punny lodging name)
5. A chocolate made with hazelnuts
6. Pair of socks?
7. It involves the lighting of kinara candles
8. Powerful bloodline?
9. Former acorn

10. TV producer Rhimes
11. Jazzman Lateef
12. Invite for
13. "The Constant Gardener" Oscar winner
18. Think worthy of doing
23. Hot Mediterranean wind during unsettled summer weather
25. Owns
26. Bassoonist's need
27. See 2-Down
28. In Luc-en-Diois, France, a wind that blows warm in winter and cool in summer
32. Capital of Lithuania
34. Branch-like ice crystal formations
35. Beginning to cure?
36. Trough stuff

39. Work-order detail
41. Line from a meteorologist?
44. Watch reading
46. Thigh-slappers
48. Hydrocarbon suffix
50. Dressed, Highland-style
52. Doesn't work anymore, informally
53. Former Syrian strongman
54. Hurricane in parts of the Greater Antilles
55. Kind of resistance
56. Audibly disapproved
60. Guido \_\_\_\_\_, painter of the "Crucifixion of St. Peter"
61. Part of NEA
64. Director DuVernay
65. Say "Climate change is a hoax," say

See page 327 for the answers to this puzzle.

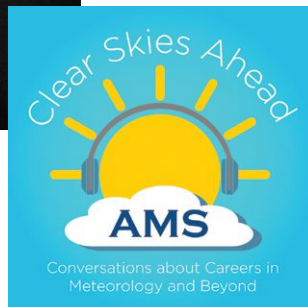

## CLEAR SKIES AHEAD

*“The SOARS program—the Significant Opportunities in Atmospheric Research and Science—is an internship program funded by the National Science Foundation at NCAR. The cool thing about this internship is that you can come back multiple summers. The first summer I did a project on atmospheric chemistry, specifically looking at ozone, but I realized there weren’t any clouds involved and that I needed more water. So the following summer I tried cloud physics and started learning about numerical models and microphysics parameterizations. They also focus on professional development at SOARS and teach you how to write, think scientifically, pose a hypothesis, and present your work both orally and in poster format. It’s a great opportunity to meet other students that will be your peers in the future.”*

— ANNARELI MORALES, an air quality policy analyst with the Weld County Department of Public Health and Environment in Greeley, Colorado, on her involvement with the SOARS program.
